

WEBINAR #2

How to create just, equitable and accessible green and blue spaces in cities?

Monday 19th of November 16h00 - 17h00 CET

This webinar will bring together scientific experts and city representatives to present research findings as well as practical experiences on planning and design of urban green and blue infrastructure. Join our discussion on how cities can become more socially and environmentally just to ensure that all the citizens have access to the multiple benefits these spaces provide.

Dagmar Haase

Professor of landscape ecology
Humboldt University Berlin

Johannes Langemeyer

Postdoctoral researcher on urban social-ecological systems, Barcelona Laboratory for Environmental Justice and Sustainability

Giovanni Fini

Technical coordinator environment sector, department for urban planning and environment, City of Bologna, Co-coordinator of the EU Urban Agenda partnership on sustainable land use and nature-based solutions

Moderated by:

Chantal van Ham, IUCN and Alice Reil, ICLEI
